BREAKING NEWS!!!

AIC OPENING UP NEW OUTPATIENT IMAGING CENTER IN RIDGECREST, CA

It is with great pleasure to announce that AIC will be opening up a new outpatient imaging center in Ridgecrest, CA in early February 2009. It will be located at

Advanced Imaging Center Department of Radiology 1111 N. China Lake Blvd. Ridgecrest, CA 93555

Tel: (760) 446-1999 Fax: (760) 446-1910

AIC will initially provide <u>MRI</u> services on a high-field 1.5 Tesla Siemens unit. Shortly afterwards, full <u>CT</u> services on a 16 slice CT scanner will be provided. We will also be adding <u>4D Ultrasound</u>, <u>X-ray</u>, <u>DEXA</u>, and possibly <u>Mammography</u> services in the near future.

AIC has been in practice for over 11 years in the Antelope Valley and over 4 years in the Santa Clarita Valley. Our highly qualified board-certified radiologists will provide you with the most accurate radiology reports. We sincerely believe in providing the best quality services to our referring doctors and their patients. The patients have the #1 priority for us, and we will do everything in our power to keep them happy.

I am, myself, a board certified diagnostic radiologist and have been in private practice for about 15 years. I am fellowship trained in all aspects of MRI and wrote a book "MRI: The Basics" (3rd Edition coming soon) which has been used at some of the major universities for teaching radiology residents the fundamentals of MRI and MR Physics. However, I am proficient in all aspects of radiology including CT, Ultrasound, Nuclear Medicine and PET scanning. I also have a Ph.D. in Electrical and Computer Engineering.

As an added service for your patients, if necessary, we will provide travel expense reimbursement to your patients on services not currently provided in our Ridgecrest center but in our AV facilities (such as Nuclear Medicine and PET scanning and select US-guided or CT-guided biopsies).

For more information you may contact us at any of the below numbers.
